

Title of Project: Personalised Study Planner

Name of the Innovators:

- S. Pothanaaditya Reddy
- P. Krishna Vamsi
- S. Poorna Sankar
- R. Hemadri
- S. Venkat Kalyan

Start Date: 13-10-2025

End Date: 18-10-2025

Day 1: Empathise & Define

Step 1: Understanding the Need

Which problem am I trying to solve?

“Students struggle with organizing their study schedules, staying consistent, and identifying what topics need more focus. They often waste time deciding what to study next or fail to balance subjects effectively.”

Who is affected by this problem?

Students at all levels — school, college, and university — who face difficulties in managing time and optimizing their learning process.

How did I find out about this?

- Interviews
- Observation
- Online Research
- AI Tools

Step 2: What is the problem?

“I am ideating a solution for students who struggle with managing their study routines efficiently and want a personalized planner that adapts to their performance and learning pace.”

Why is this problem important to solve?

“This problem is important to solve because poor study planning leads to stress, poor performance, and lack of motivation. Studies show that over 65% of students face time management issues and procrastination before exams.”

AI Tools you can use for Step 1 and 2:

ChatGPT – for research and brainstorming study challenges

Perplexity AI – for data and research insights

Day 2: Ideate

Step 3: Brainstorming Solutions

List at least 5 different solutions:

1. Smart Study Planner – AI-generated daily plans based on progress
2. Focus Mode – Timer and Pomodoro assistant with reminders
3. Adaptive Study Suggestions – Topic prioritization based on weak areas
4. Motivation Tracker – Daily quotes, streaks, and mood-based nudges
5. Study Sync – Group study coordination with shared schedules

Step 4: My favourite solution:

“Personalised Study Planner – AI adapts study plans automatically based on performance and time availability.”

Step 5: Why am I choosing this solution?

Because it combines time management and adaptive AI learning, giving users an all-in-one personal assistant that builds smart study routines, balances subjects, and adjusts based on progress.

AI Tools you can use for Step 3-5:

ChatGPT / Perplexity AI – for brainstorming and refining ideas

Canva AI – for UI mockups of planner design

Day 3: Prototype & Test

Step 6: Prototype – Building my first version

The solution is a mobile/web planner that asks users for their syllabus, deadlines, and preferred study times. It creates a daily personalized timetable that adapts automatically as the student completes or misses sessions.

Features include:

- Smart daily plan generator
- Study streak tracker and focus timer
- Topic performance analytics
- Motivational prompts and AI reminders

AI Tools I can use to build this:

- ChatGPT Free Tier – for generating adaptive plans and feedback prompts
- Notion AI / Thunkable – for creating mobile-friendly prototype
- Adalo – to create the functional app interface

Step 7: Test – Getting Feedback

Who did I share my solution with?

Team members and peers

What feedback did I receive?

They found the planner highly useful, especially the adaptive and motivational features. Some suggested integration with Google Calendar for better syncing.

- 👍 **What works well:** Smart scheduling and adaptive suggestions
- 🔑 **What needs improvement:** Include exam countdown reminders and offline mode

AI Tools for Step 6-7:

ChatGPT / Canva AI / Figma AI – to refine prototype and feedback

Day 3: Showcase

Step 8: Presenting my Innovation

Final Project Title:

Personalised Study Planner – **“YOUR SMART STUDY COMPANION”**

Document key points of my presentation:

- **Problem:** Students struggle to manage time and stay consistent
- **Solution:** AI-based adaptive planner that manages schedule and motivation
- **Feedback:** Users loved its adaptability and tracking tools
- **Impact:** Reduces procrastination and helps maintain study discipline

Step 9: Reflections

What did I enjoy the most?

Designing the planner's adaptive logic and learning how AI can personalize schedules.

What was my biggest challenge?

Integrating all features within a short time and managing synchronization with multiple devices.

AI Tools for Step 8:

Canva AI – to design the pitch document and visual presentation.
